Product Information

PRODUCT DESCRIPTION

Principal Uses:

Compac #251 double coated/SSL (Self-Seal Lap) tape is used to seal vapor retarder or facing overlap seams on mechanical and other types of insulation. It can also be used to apply patches or to hang vapor retarders or facings on structural members, and has many general non-insulation uses.

Features/Benefits:

Compac #251 tape features an aggressive, all-weather acrylic adhesive that bonds tightly and permanently when smoothed down on the insulation facing surface. AW adhesive technology permits service temperatures of -30°F to 200°F (-34°C to 93°C), and an application range of 0°F to 130°F (-18°C to 54°C). An easy-lift edge makes liner removal a cinch, even with work gloves.
